

## Hurricanes | During Hazard Preparation Checklist

### What Should I Do During a Hurricane?

- ❑ Monitor conditions using a NOAA Weather Radio or your preferred local news source.
  - ❑ Stay indoors, away from windows, skylights, and doors, even if they are covered.
  - ❑ If power has been lost, do not open refrigerators or freezers unless absolutely necessary.
  - ❑ If you need to venture outside, be aware of downed power lines.
  - ❑ Avoid flooded roads or property which pose a drowning or electrocution risk.
- Maintain contact with friends and neighbors who may be more vulnerable due to functional needs.
